

## ACKNOWLEDGMENT

I would sincerely like to acknowledge the efforts of many people who contributed to the research and to this thesis in particular. Without them, the works would never have been undertaken.

Technically, I am profoundly indebted to my thesis Chairman Advisor Dr.Chanchai Yarwudhi, who offered me excellent guidance and useful suggestions. His dedication and commitment to my work will always be appreciated and remembered. Assistant Professor Patsi Prasomsin and Dr.Damrong Sripraram, the Committee Advisor for their guidance, constructive discussion, suggestion, and encouragement, without them this study would not have attained this level.

I would like to express my appreciation to Associate Professor Utis Kutintara, Associate Professor Wuthipol Hoamuangkaew, Associate Professor Apichart Pattaratuma, for their kind guidance and suggestions throughout the time of study. And my special appreciation to the graduate school representative, Assistant Professor Dachanee Emphandhu for her many helpful comments and suggestions. My deeply gratitude go to Acharn Tawee Kaewla-iad, he always my best teacher who ever brought me into the engineering world and taught me how to be a perfected man. And also, special thanks goes to, Miss Jirapa Chaijaroon, Miss Rasikar Chudkuntod, and Miss Wanwimol Taprik for their typing work. I am also indebted to those engineering colleagues, Miss Wanwisa Kumsom, Miss Sriwan Kropsuk, Mr.Sataporn Srijumnong, and Mr. Preecha Limtrakoon for their helpful works in data collection in the field and engineering works. I am very grateful to Graduate School for supporting research fund to fulfill my study.

Finally, my appreciation devotes to my family who always give me heartfelt supports, encouragement and understanding throughout my academic studies.
