

LIST OF FIGURES

Figure		Page
1	Superimposition of AChE, BChE (homology model) and BChE (generated by MODELLER)	6
2	The active site regions of superimposed structures of TcAChE (refined structure), BChE (homology model) and BChE (generated by MODELLER)	7
3	The three-dimensional structure of butyrylcholinesterase	8
4	Structure of (-)-cocaine	8
5	Sketch of a molecule embedded in a ionic solution, according to the continuum representation	32
6	Structure of Cluster and Cluster-amino acid model butyrylcholinesterase	38
7	Schematic diagram for electronic embedding method. The framework of structure of BChE	39
8	Schematic representation of the double-proton-transfer mechanism for BChE-catalyzed hydrolysis of (-)-cocaine at the benzoyl ester	45
9	Representation of Cluster and Cluster-amino acid model of butyrylcholinesterase: ES-complex	48
10	Representation of Cluster and Cluster-amino acid model of butyrylcholinesterase: TS1-complex	49
11	Representation of Cluster and Cluster-amino acid model of butyrylcholinesterase: INT1-complex	50
