

LIST OF TABLES

Table		Page
1	Element analysis and oxidation number	4
2	The experiment of microemulsion method with different cerium sources and surfactants.	25
3	The experiment of combined method of homogeneous precipitation and microemulsion with different cerium sources and surfactants.	27
4	The experiment of mixing of two microemulsions with different cerium sources and surfactants.	31
5	Average particle sizes from TEM images of CeO ₂ prepared from microemulsion method using PE4LE as a surfactant.	50
6	Average particle sizes from TEM images of CeO ₂ prepared from microemulsion method using Brij96V as a surfactant.	54
7	Average particle sizes from TEM images of CeO ₂ prepared from microemulsion method using CTAB as a surfactant and butanol as a cosurfactant.	57
8	Average particle sizes from TEM images of CeO ₂ prepared from combined methods of homogeneous precipitation and microemulsion using PE4LE as a surfactant.	64
9	Average particle sizes from TEM images of CeO ₂ prepared from combined methods of homogeneous precipitation and microemulsion using CTAB as a surfactant and butanol as a cosurfactant.	67
10	Average particle sizes from TEM images of CeO ₂ prepared from mixing of two microemulsions using PE4LE as a surfactant.	71
11	Average particle sizes from TEM images of CeO ₂ prepared from mixing of two microemulsions using CTAB as a surfactant and butanol as a cosurfactant.	75

LIST OF TABLES (cont'd)

Table	Page
12 Average particle size from TEM images using different methods.	76
 Appendix Table	
A1 Particle size evaluated from TEM images: Microemulsion method (method 1) using PE4LE as a surfactant.	95
A2 Particle size evaluated from TEM images: Microemulsion method (method 1) using Brij96V as a surfactant.	95
A3 Particle size evaluated from TEM images: Microemulsion method (method 1) using CTAB as a surfactant and butanol as a cosurfactant.	96
A4 Particle size evaluated from TEM images: Combined methods of homogeneous precipitation and microemulsion (method 2) using PE4LE as a surfactant.	96
A5 Particle size evaluated from TEM images: Combined methods of homogeneous precipitation and microemulsion (method 2) using CTAB as a surfactant and butanol as a cosurfactant.	97
A6 Particle size evaluated from TEM images: Mixing of two microemulsions (method 3) using PE4LE as a surfactant.	97
A7 Particle size evaluated from TEM images: Mixing of two microemulsions (method 3) using CTAB as a surfactant and butanol as a cosurfactant.	98
B Summarize the calculation of average particle size, standard deviation, standard error of mean, and percent standard error of mean.	101
