ACKNOWLEDGEMENTS

The researcher greatly appreciates and is obliged to Dr.Monthon Thanuttamvong, guidance and advice as correction from time to until completion of this research. I must also thanks Associate Professor Dr.Chart Chemchaisri for support the flocculator column, Assistant Professor Dr.Cheema Chomsurin for her suggested image processing program and comments on my thesis. I would also like to thanks Associate Professor Prasert Suwanvitaya, the representative of Graduation School for their revision instruction until completion of the thesis.

I am extremely appreciative of Mrs. Sasiwimol Hoontrakul, who helped my laboratory work. This research would not have been accomplished without her support.

In addition, I would like to extend my sincere thanks to Ms. Supa Vihokpaibul, Mrs. Bangorn Inpum and Ms. Panumas Puongkaew for providing comments and necessary information related to the study.

Finally, I would like to express my special thanks to my family for their endless help and offering me moral support during my studies.
