

ACKNOWLEDGEMENTS

First of all, I would like to thank my advisor, Prof. Dr. Jumras Limtrakul, for giving me an opportunity to study and do research work in this field and for his continuous support in my Ph.D. program, valuable guidance, encouragement and worthwhile discussions on various topics. I would also like to thank my Ph. D. committees, Associate Professor Supa Hannongbua, Dr. Pensri Bunsawansong and Assistant Professor Piboon Pantu for their useful suggestions and remarks to fulfill this thesis works. Furthermore, I would like to thank Prof. Thanh N. Truong (University of Utah) and Prof. Michael Probst (Innsbruck University) for insightful discussions.

During the course of this work, I was supported by grants from the Ministry of University Affairs under the Science and Technology Higher Education Development Project (MUA-ADB funds) and Kasetsart University Research and Development Institute (KURDI). I would like to express my gratitude to the Laboratory for Computational and Applied Chemistry (LCAC) and Chemistry Department for supporting research facilities.

In addition to my advisors and thesis committees, I would like to thank all of my friends and especially Vitoon Naprasertkul, Suwan Chansong, Pipat Khongpracha, Somkiat Nokbin, Chadchalerm Raksakoon, Supawadee Namuangruk, Wasinee Panjan, Supawan Kasuriya, Thanyada Rungrotmongkol, Chompunuch Warakulwit, Ratana Rungsirisakun and Natcha Injan for their help, encouragement and friendship during my study in the Ph. D. program at Kasetsart University.

Last, but not least, I would like to thank my parents for giving me my life, for educating me in everything, and for their unconditional support and encouragement to pursue my interests. I also thank my sister Siripan and my brother Jakkapong for listening to my complaints and frustrations and for believing in me constantly. Thanks so much to all those who have supported me until I receive this Ph. D. degree.
