

## ACKNOWLEDGEMENT

I would like to express my deep and sincere gratitude to my supervisor, Professor Irb Kheoruenromne. His knowledge and his logical way of thinking have been of great value for me. His understanding, encouraging and personal guidance have provided a good basis for the present thesis.

I am deeply grateful to the co-advisor, Associate Professor Anchalee Suddhiprakarn for her detailed and constructive comments, and for her important support throughout this work. I am also sincerely grateful to Professor Bob Gilkes, Soil Science and Plant Nutrition, School of Earth and Geographical Sciences, University of Western Australia for his encouragement, kind suggestion and support. I wish to express my warm sincere thanks to Dr Aniruth Pothichan, Land Development Department, a committee member and Associate Professor Apisak Popan, KMITL, an external examiner, for their kind suggestion and comments.

I wish to extend my warmest thanks to all my friends and colleagues at the Soil Survey Group in the Department of Soil Science at Kasetsart University for their interest and support during the course of my work, especially Dr. Punyisa who helped me all the time of research and live and also Chuthamard, Dr. Supicha, Dr. Wimolnan, Naruekamon, Prisana, Krichsana, Saranya, Supaluk, Ladawan and Kamolwan for all their help.

I really must also thank Nuttatporn Prakongkep who liveing together with me during our stay in Australia and helped me a lot in the context of my study and being a good sister. Thanks to Buddy group (Thai students) in Perth for a warm friendship.

My sincere thanks are to Mr. Piboon Kanghae, Mr. Parmunpong Sintusant, Dr. Somchai Anusontpornperm, Dr. Saowanuch Tawornpruek, Dr. Sumitra Watana and Dr. Wanpen Wiriyaakitnatekul for their help and guidance and also to, Mr. Natthawat, Mr. Pisud, Mr. Anuwat, Ms. Pornpana, Ms. Sumchai, Mr. Chanchai, Mr. Rattanachart, Ms. Supaluk, Mr. Sanee, Mr. Saroat and all staff at Land Development Department and Soil Science Department for their kind support.

I owe my deep appreciation to Assistant Professor Pongsun Seechan for his kind suggestions and support. Thank to all lovely friend, especially Ann, Oh, Juk, Bob, Chart, Chai, Da, Tu and PYut for their help and loving support.

I would like to acknowledge to all my friends and staff at Soil Science and Plant Nutrition, School of Earth and Geographical Sciences, UWA for their welcoming approach and technical supports, especially Mr. Michael Smirk, Katarian Brown and Gary Cass and also to all staffs at CMM, especially Dr. Janet Muhling.

I am grateful to the Royal Golden Jubilee Ph.D. Program, Thailand Research Fund, for the financial support of the study.

Above all, I am very grateful to my warm family for their eternal love and irreplaceable support.
