

Term Paper Title : Knowledge and Participation of People in Garbage Management in the Area of Samreun Subdistrict Administrative Organization in Muang District in Ratchaburi Province.

Author : Mr. Poothai Chormuaen **Major :** Industrial Technology Management with Emphasis in Construction Management **Year :** 2010

Abstract

The purposes of this study were: 1) to determine level of people's knowledge on garbage management in the area of Samreun Subdistrict Administrative Organization in Muang District, Ratchaburi Province, 2) to determine level participation of people in garbage management in the area of Samreun Subdistrict Administrative Organization based on their social status, and 3) to compare participation of people in garbage management in area of Samreun Subdistrict Administrative Organization. The samples of this study were 274 heads of household randomly drawn from those residing in Samreun subdistrict. A questionnaire was used for data collection. The data were analyzed to determine frequency, percentage, mean, and standard deviation. The t-test, F-test, and Scheffé test were applied for testing the hypotheses.

It was found that:

1. The people's knowledge on garbage management in area of Samreun Subdistrict Administrative Organization in Muang District, Ratchaburi Province was a high level.
2. The participation of people in garbage management in the area of Samreun Subdistrict Administrative Organization was at a high level.
3. Heads of household who had different education had different participation in garbage management in the area of Samreun Subdistrict Administrative Organization in Muang District, Ratchaburi Province significantly at .05 level. But, difference in gender, age, and period of residing in the subdistrict area did not yield any significant different participation in the garbage management.
