

ACKNOWLEDGEMENT

At first I would like to express my gratitude and deep appreciation to Professor Nipon Tangtham, Ph.D, the chairman of the advisory committee for his guidance, suggestions and encouragement towards my successful completion of this study. The lessons that I have learned from him about watershed management research and practices are invaluable and will not be forgotten.

I would also like to thank my committee: Associate Professor Wicha Niyom, Assistant Professor Monton Jamroenprucksas for their comments and useful suggestions. I am especially grateful to Mr. Chatchai Tantasirin, M.S. for his comments and suggestions. I am also grateful to all watershed management students for their assistance about GIS during this study. Deserving special mention are Mr. Jakkrit and Mr. Chanchai, MS student.

I wish to thank Miss Kanokporn Boochabun, officer of Royal Irrigation Department for supporting me with the necessary hydrological data from that Department. Special thanks are also due to Mrs. Imon and Mr. Saranyanope Intasen, officer of The Office of Agricultural Economics for their help regarding land use data. My thanks also go to Mr. Somchai On-aasa, Chief of Pasak Watershed Research Station, Pechabun Province for his kind help during my visit to the study area.

I am especially grateful to Dr. Suree Bhumibhamon, Course Leader of Tropical Forestry Program for his valuable advice, comments and overall supervision during this study. I would also like to thank Dr. Damrong Pipatwatanakul for his necessary assistance towards completion of this study.

I want to express thanks to Chief Conservator of Forests, Forest Department, Bangladesh for awarding me the scholarship for conducting this study.

Finally, I would like to dedicate this thesis to my parents, my wife and children for their patient and cheerful encouragement during my study period.
