

Bunshita Boontang 2011: Practicing of Typing Thai-touching Keyboard by Using the Colour-assisted for Prathomsuksa 1 Students, Kasetsart University Laboratory School, Center for Educational Research and Development. Master of Education (Business Education), Major Field: Business Education, Department of Vocational Education. Thesis Advisor: Associate Professor Yos Subyen, M.A. 188 pages.

The purpose of this study was to practicing of typing Thai-touching keyboard by using the colour-assisted for Prathomsuksa 1 Students, Kasetsart University Laboratory School, Center for Educational Research and Development.

The samples used in this study were Prathomsuksa 1 students from eight classrooms at Kasetsart University Laboratory School. The samples of this study consisted of two group using a purposive selection, and experimental group. Sixteen students were taught by colour-assisted techniaue and control group 16 students were taught by traditional teaching method. The research instruments were; lesson practice typing, observation form typing and the memory evaluation of color keyboard. The obtained data were analyzed by mean, standard deviation, and t-test.

The results of this research showed that: practice in touch typing Thai keyboarding skills by using colour-assisted technique; consist of practice in typing, memory of colour keyboard and technique in typing were not development. However, the total scores of experimental and control groups showed that: typing skills were statistically significant difference at the .05 level. Memory of colour; the total scores average were statistically significant difference at the .05 level. And typing technique; the total scores average are difference statistically significant difference at the .05 level.
