

Message from TSAE President

The 10th Annual Conference of **Thai Society of Agricultural Engineering (TSAE)**, at both international and national levels, entitled '*Innovations in Agricultural, Food and Renewable Energy Productions for Mankind*' has been graciously and efficiently organized by **Suranaree University of Technology** as the host, who also invited **Japanese Society of Agricultural Machinery (JSAM)** to co-host this important event. This conference will certainly provide an excellent open forum for professionals, researchers and people working in relation to the field of Agricultural Engineering to exchange/disseminate new knowledge and technology, research experiences and expertise which will help create strong relationships and links between us all for the near future.

TSAE is truly proud of the due success of this conference and wishes to express its great thanks to all personnel of the **School of Agricultural Engineering, Institute of Engineering, Suranaree University of Technology**, who have contributed tirelessly and wholeheartedly to the effective and impressive outcome of the conference. TSAE also sincerely thanks all the participants who are definitely a part of this successful event, and hopes that all the objectives of this conference are fulfilled in every way for the benefit of mankind.

Associate Professor Dr. Thavachai Thivavarnvongs
President, Thai Society of Agricultural Engineering
