

LIST OF FIGURES

Figure		Page
1	Transesterification of triglyceride with alcohol	14
2	General reaction for transesterification of triglycerides	14
3	Mechanism of base catalyzed transesterification	16
4	Molecular structure of oleic acid	17
5	Molecular structure of triolein	17
6	Molecular structure of triolein: (a) 1 st triolein (b) 2 nd triolein	35
7	Transesterification mechanism type1	37
8	Transesterification mechanism type2	41
9	Transesterification mechanism type3	46
10	Transesterification mechanism type4	50
11	Transesterification mechanism type5	55
12	Transesterification mechanism type6	59
13	A simple diagram of transesterification mechanism	65
14	Total energy of triolein optimization in semiempirical AM1: (a) 1 st triolein (b) 2 nd triolein	68
15	Total energy of triolein optimization in semiempirical PM3: (a) 1 st triolein (b) 2 nd triolein	69
16	Total energy of triolein optimization in semiempirical HF6-31G: (a) 1 st triolein (b) 2 nd triolein	70
17	The reaction structure of triolein and methoxide in transesterification of triolein: (a) input and (b) output	73
18	The reaction structure of intermediate1 and methanol in transesterification of triolein: (a) input and (b) output.	74
19	The reaction structure of diolein and methoxide in transesterification of diolein: (a) input and (b) output.	76
20	The reaction structure of intermediate1 and methanol in transesterification of diolein: (a) input and (b) output.	77

LIST OF FIGURES (cont'd)

Figure	Page
21 The reaction structure of monoolein and methoxide in transesterification of monoolein: (a) input and (b) output.	78
22 The reaction structure of intermediate1 and methanol in transesterification of monoolein: (a) input, (b) structure of 22 nd cycle and (c) output.	80
23 The reaction structure of triolein and methoxide in transesterification of triolein: (a) input and (b) output.	81
24 The reaction structure of intermediate1 and methanol in transesterification of triolein: (a) input and (b) output.	83
25 The reaction structure of diolein and methoxide in transesterification of diolein: (a) input and (b) output.	84
26 The reaction structure of intermediate1 and methanol in transesterification of diolein: (a) input and (b) output.	86
27 The reaction structure of monoolein and methoxide in transesterification of monoolein: (a) input, and (b) output.	87
28 The reaction structure of intermediate1 and methanol in transesterification of monoolein: (a) input and (b) output.	88
29 The reaction structure of triolein and methoxide in transesterification of triolein: (a) input and (b) output.	90
30 The reaction structure of intermediate1 and methanol in transesterification of triolein: (a) input and (b) output.	91
31 The reaction structure of diolein and methoxide in transesterification of diolein: (a) input and (b) output.	93
32 The reaction structure of intermediate1 and methanol in transesterification of diolein: (a) input and (b) output.	94
33 The reaction structure of monoolein and methoxide in transesterification of monoolein: (a) input and (b) output.	95

LIST OF FIGURES (cont'd)

Figure	Page
34 The reaction structure of intermediate1 and methanol in transesterification of monoolein: (a) input, (b) structure of 19 th cycle and (c) output.	97
35 The reaction structure of triolein and methoxide in transesterification of triolein: (a) input and (b) output.	98
36 The reaction structure of intermediate1 and methanol in transesterification of triolein: (a) input and (b) output.	100
37 The reaction structure of diolein and methoxide in transesterification of diolein: (a) input and (b) output.	101
38 The reaction structure of intermediate1 and methanol in transesterification of diolein: (a) input, (b) structure of 17 th cycle and (c) output.	103
39 The reaction structure of monoolein and methoxide in transesterification of monoolein: (a) input and (b) output.	104
40 The reaction structure of intermediate1 and methanol in transesterification of monoolein: (a) input and (b) output.	106
41 The reaction structure of triolein and methoxide in transesterification of triolein: (a) input and (b) output.	107
42 The reaction structure of intermediate1 and methanol in transesterification of triolein: (a) input and (b) output.	109
43 The reaction structure of diolein and methoxide in transesterification of diolein: (a) input and (b) output.	110
44 The reaction structure of intermediate1 and methanol in transesterification of diolein: (a) input, (b) structure of 3 rd cycle, and (c) output.	112
45 The reaction structure of monoolein and methoxide in transesterification of monoolein: (a) input and (b) output.	113

LIST OF FIGURES (cont'd)

Figure	Page
46 The reaction structure of intermediate1 and methanol in transesterification of monoolein: (a) input and (b) output.	114
47 The reaction structure of triolein and methoxide in transesterification of triolein: (a) input and (b) output.	116
48 The reaction structure of intermediate1 and methanol in transesterification of triolein: (a) input and (b) output.	117
49 The reaction structure of diolein and methoxide in transesterification of diolein: (a) input and (b) output.	119
50 The reaction structure of intermediate1 and methanol in transesterification of diolein: (a) input, (b) structure of 9 th cycle and (c) output.	121
51 The reaction structure of monoolein and methoxide in transesterification of monoolein: (a) input and (b) output.	122
52 The reaction structure of intermediate1 and methanol in transesterification of monoolein: (a) input and (b) output.	123
