

ACKNOWLEDGEMENTS

I would like to grateful thank and deeply indebted to Assoc. Prof. Dr. Sutruedee Prathuangwong, a major committee for advice, encouragement and valuable suggestion for completely writing of thesis. I would sincerely like to thank Asst. Prof. Dr. Wichai Kositratana and Asst. Prof. Dr. Gunjana Theeragool, a co-major committee and Dr. Wanphen Srithongchai, a representative from the graduate school for their valuable comments and suggestion. I wish to express my sincere appreciation to Prof. Dr. Shinji Tsuyumu, a co-major committee from Shizuoka University, Japan for his valuable suggestions and comments.

I gratefully thank Dr. Fujikawa Takashi for his suggestion and enthusiasm providing technical assistance during research work at Shizuoka University. I would like to sincerely thank Asst. Prof. Chaisit Preecha for his kindly comments for complete writing of thesis.

I would like to heartfelt thanks to Mr. Dusit Athinuwat, Miss Nattitiya Buensuntie, Miss Wilwan Chuaboon and all of members in plant pathogenic bacterial laboratory under Assoc. Prof. Dr. Sutruedee's adviser, for their encouragement and strong assistance.

I would like to express the appreciation to the Thailand Research Fund (TRF) for the financial support of this research under the Royal Golden Jubilee Ph.D (RGJ) Program.

Finally, I am especially appreciated my parents, my sister and brothers for their continuing encouragements.
