LIST OF FIGURES	iv
INTRODUCTION	1
LITERATURE REVIEWS	7
MATERIAL AND METHODS	21
Materials	21
Methods	22
RESULTS AND DISCUSSION	54
Analysis of output	54
Discussion	68
CONCLUSION AND RECOMMENDATION	69
Conclusion	69
Recommendation	70
LITERATURE CITED	71
APPENDIX	74

LIST OF TABLES

Table	Page
1 Basic Dispatching Rules	9
2 Literature Review Summary	19
3 8 Main Product Ranges	23
4 Products in the 6 Family Groups	28
5 List of machines for general round can and rectangular can	33
6 Summary of Standard Times for each Operation	35
7 General round can line data	39
8 Rectangular can line data	39
9 Example data from sale department and for calculation dispatching rules	40
10 Conclusion of job sequencing by using dispatching rules	42
11 The comparison C_{\max} in phase I by using dispatching rules	43
12 Identify skill to the worker	45
13 The comparison SPT C_{\max} by multi-skill First at 20:80 arrangement rules	51
14 Number of Jobs and Number of Production in pieces within 6 months.	54
15 Penalty rate 25%	57
16 Penalty rate 50%	58
17 Penalty rate 100%	60

Appendix Table

A1 The number of order jobs and completion time for DATA 1	76
A2 The number of order jobs and completion time for DATA 2	84
A3 The number of order jobs and completion time for DATA 3	91
A4 The number of order jobs and completion time for DATA 4	98
A5 The number of order jobs and completion time for DATA 5	105
A6 The number of order jobs and completion time for DATA 6	113

LIST OF TABLES (Cont'd)

Appendix Table		Page
B1	The result of C_{\max} from two step scheduling in different dispatching rule and skill , Class 1	122
B2	The result of C_{\max} from two step scheduling in different dispatching rule and skill , Class 2	128
B3	The result of C_{\max} from two step scheduling in different dispatching rule and skill , Class 3	134
B4	The result of C_{\max} from two step scheduling in different dispatching rule and skill , Class 4	140
B5	The result of C_{\max} from two step scheduling in different dispatching rule and skill , Class 5	146
B6	The result of C_{\max} from two step scheduling in different dispatching rule and skill , Class 6	152

LIST OF FIGURES

Figure		Page
1	The workers have different skills.	2
2	A typified flow shop where jobs follow the same route	2
3	Conceptual Model	5
4	A classifications of scheduling problems.	8
5	General round can.	27
6	Rectangular can.	27
7	Press process of lid.	28
8	Sealing with rubber compound.	29
9	Production process for product class 1 general round cans (low, 1 gallon).	30
10	Production Process for Product Class 2-4 General Round Cans.	31
11	Production Process for Product Class 5-6 Rectangular Cans.	32
12	The concept and scope of the thesis.	37
13	Random allocation.	46
14	Allocate workers with multi-skill first.	46
15	Allocate workers with single-skill first.	47
16	Maximum processing time.	48
17	Sequential machines.	49
18	Higher number of available machines.	50
19	Heuristic flow chart.	52
20	The completion time from the simple dispatching rule.	55
21	Skill effects at 25% penalty rate.	58
22	Skill effects at 50% penalty rate.	59
23	Skill effects at 100% penalty rate.	61
24	Skill effects at different penalty rates using heuristic rule 1 Single skill first.	62

LIST OF FIGURES (Cont'd)

Figure	Page
25 Skill effects at different penalty rates using heuristic rule 2 Multiple skill first.	62
26 Skill effects at different penalty rates using heuristic rule 3 Random skill	63
27 Effects of different machine priority rules at 25% penalty rates	64
28 Effects of different machine priority rules at 50% penalty rates	64
29 Effects of different machine priority rules at 100% penalty rates	65
30 The number of orders meet due date	66
31 Weekly carry over jobs	66
Appendix Figure	
C1 Single skill first at different dispatching rule and penalty rate	159
C2 Multi skill first at different dispatching rule and penalty rate	161
C3 Random worker at different dispatching rule and penalty rate	163
