

# THESIS

PART I : SYNTHESIS OF (±)-ISAGARIN, (±)-MARTICIN AND (±)-  
ISOMARTICIN BY PALLADIUM(II) CATALYSIS

PART II: STEREOSELECTIVE PALLADIUM(0)-CATALYZED  
FOUR-COMPONENT CASCADE SYNTHESIS OF PYRROLIDINYL  
ISOQUINOLINES

the Requirements for the Degree of  
Doctor of Philosophy (Organic Chemistry)  
Graduate School, Kasetsart University

2007

## ACKNOWLEDGEMENTS

I would like to express my sincere gratitude to my advisor, Associate Professor Boonsong Kongkathip, whose teaching and guidance were a source of great inspiration to me. His valuable helpful suggestions, and assistance were indispensable throughout the course of my graduate study at Kasetsart University.

Thanks are extended to Professor Ronald Grigg for his valuable discussions, suggestions and assistance and also Dr. Sridharan Visuvanathar for his continuous support, advice and discussions while working on my thesis at University of Leeds (MIDAS), England.

I also gratefully acknowledge Associate Professor Ngampong Kongkathip and Associate Professor Apisit Songsasen, my two co-advisors for their suggestions and helpful assistance.

Thanks to Dr. Simon Barret (NMR), Tanya Marinko-Covell (mass spectral data), Martin Huscroft and Ian Blakely (microanalysis), for their professional assistance. Thanks are extended to Associate Professor Sunit Suksamlarn, Department of Chemistry, Faculty of Science, Srinakarin Wiroth University for NMR analyses.

The Thailand Research Fund (TRF) under the Royal Golden Jubilee Program is acknowledged for financial support.

I also express gratitude to the Natural Products and Organic Synthesis Research Unit (NPOS), Department of Chemistry, Faculty of Science, Kasetsart University and the Molecular Innovation, Diversity and Automated Synthesis centre (MIDAS), School of Chemistry, University of Leeds.

Finally, I am thankful to my parents for their understanding, encouragement and warm hospitality and also to the people whose company I have enjoyed.
