

ACKNOWLEDGEMENTS

I wish to express my sincere gratitude to my supervisor, Associate Professor Ngampong Kongkathip, for providing me the opportunity to study Ph.D. at Kasetsart University, her guidance, supervision and encouragement throughout the course of this work.

I am very grateful to my co-supervisors, Associate Professor Boonsong Kongkathip and Dr. Chak Sangma, for his kindness, guidance and comments. Special thanks go to Professor Ron Grigg for giving me the opportunity to work in MIDAS laboratory, University of Leeds, UK, partial financial support and also his guidance and supervision. Thanks also to Dr. Visuvanathar Sridharan for his guidance and advice when I worked at University of Leeds, UK.

Moreover, I would like to extend my appreciation to technical staffs both at Kasetsart University and University of Leeds. I am thankful to Dr. Pensri Boonsawansong for providing NMR spectral data.

I am very grateful to the Royal Golden Jubilee PhD program under the Thailand Research Fund for the financial support.

Finally, I am thankful to all of colleagues and friends in NPOS and MIDAS laboratories for their supporting and friendship. Especially thanks must go to my family for warm hospitality, understanding and supporting.
