

## LIST OF TABLES

Table		Page
1	Synthesis of naphthoquinone aliphatic esters (139-157) from naphthoquinone alcohol 102 and various aliphatic carboxylic acids using DCC and DMAP as coupling reagents (Scheme 13).....	81
2	Synthesis of naphthoquinone esters (159-162) from naphthoquinone alcohol 158 and various aromatic carboxylic acids using CDI as coupling reagent. (see Scheme 14).....	84
3	Synthesis of naphthoquinone esters (163-164) by demethylation of methyl ether with boron tribromide.....	84
4	Cytotoxic activities of naphthoquinone ester derivatives against Human Carcinoma Cell Lines (KB, HeLa and MCF-7) and normal Vero Cell Lines.....	85
5	Cytotoxic activities of naphthoquinone ester derivatives against Human Carcinoma Cell Lines (KB, HeLa and MCF-7) and Vero Cell Lines.....	89
6	<i>In vitro</i> antimalarial activity of naphthoquinone ester derivatives (139-157) against <i>Plasmodium falciparum</i> , K1 Strain.....	90
7	The experimental activity (IC <sub>50</sub> values) of naphthol derivatives tested as inhibitors of COX-1 and COX-2.....	158
8	Selective Palladium-catalysed cascade reaction of <i>N</i> -allenyl diketopiperazine derivative 306.....	253
9	Selective Palladium-catalysed cascade reaction of the <i>N</i> -allenyl -5-phenyl-1,4-benzodiazepin-2-one derivative 309.....	255
10	Selective Palladium-catalysed cascade reaction of the <i>N</i> -allenyl-1,4-benzodiazepin-2,5-dione derivative 313.....	256
11	Attempted optimisation of the cascade reaction of <i>N</i> -allenyl diketopiperazine 306 with 5-iodo-1,3-dimethyl uracil and glycine methyl ester.....	257

**LIST OF TABLES (cont'd)**

Table		Page
12	Attempted optimisation of the cascade reaction of <i>N</i> -allenyl diketopiperazine 306 with 5-iodo-1,3-dimethyl uracil and cyclopropylamine.....	258
