ACKNOWLEDGEMENTS

I would like to express my sincere appreciation and gratitude to my advisor, Asst. Prof. Dr. Sermsiri Chanprame, for her advice, support, patience, and constant encouragement throughout the course of research work and the preparation of this thesis.

I would also like to express my appreciation to my thesis committee members, Asst. Prof. Dr. Sontichai Chanprame, Asst. Prof. Dr. Ratchanee Hongprayoon and the representative from Graduate School, Assoc. Prof. Dr. Supat Attatham for their helpful technical guidance, and valuable suggestions during the course of this research and critical review of this thesis.

I would like to gratefully acknowledge Ms. Katherine Pinney, Department of Plant Science, University of California at Davis for her help and supervise on plant microtechnique for immunolocalization of secondary metabolite. I would like to thank the Department of Horticulture, Faculty of Agriculture at Kamphaeng Saen for using HPLC and microtome equipments.

My sincere thanks also for the members of plant tissue culture laboratory and serology laboratory for all advices, helpful and meaningful friendship.

This thesis is partially supported by the Center for Agricultural Biotechnology through the fund from Subproject Graduate Study and Research in Agricultural Biotechnology under the Higher Education Development Project, Commission on Higher Education, the Ministry of Education. The financial support from Kasetsart University Research and Development Institute (KURDI) is sincerely acknowledged.

Finally, I wish to thank my family for their love and encouragement which enabled me to achieve this goal.
