Appendix Table.....	234
CURRICULUM VITAE.....	241

LIST OF TABLES

Table	Page
1 Families of common aquatic and semiaquatic habitats of Diptera.....	9
2 Air temperature (°C), relative humidity (%) and rainfall (mm) at Khao Yai National Park between July 2000 and June 2001.....	36
3 Collection site descriptions at Khao Yai National Park and photographs.....	37
4 Map co-ordinates and environmental data from Khao Yai National Park between July 2000 and June 2001 (“Drought” = without flowing water).....	44
5 Measured physical variables correlation matrix (* = $p < 0.05$).....	46
6 Summary of larval characters for 12 <i>Simulium</i> species in the subgenus <i>Gomphostilbia</i>	179
7 Species counts, estimators and standard errors for the pooled sample.....	193

Appendix Table

1 List of recorded lotic Diptera taxa at Khao Yai National Park from July 2000 to June 2001. Sites numbers as in table 3.....	234
2 List of recorded black fly taxa at Khao Yai National Park from July 2000 to June 2001 and environmental data at which each was collected.....	238

LIST OF FIGURES

Figure	Page
1	Morphological features of female black fly.....16
2	Front view of adult heads: A, <i>Simulim</i> female; B, <i>Simulim</i> (<i>Simulim</i>) <i>decorum</i> male.....17
3	A, B: basic morphology of the terminalia in ventral view. A, male; B, female. C, D: basic morphology of the terminalia in lateral view. C, male; D, female.....18
4	Morphological features of pupa. A, <i>Simulium</i> (<i>Psilozia</i>) <i>vittatum</i> in lateral view; B, head integument in front view; C, obtect condition; D, abdomen in lateral view.....20
5	Morphological features of larva. A, lateral view; B, C: head capsule. B, dorsal view; C, ventral view; D, hypostomium; E, posterior tip of larval abdomen in posterodorsal view.....22
6	Khao Yai National Park, showing black fly collection sites.....35
7	Water temperature of 20 collection sites at Khao National Park. Grey = 2000, Black = 2001.....45
8	pH of 20 collection sites at Khao National Park. Grey = 2000, Black = 2001.....45
9	Stream width (max.) of 20 collection sites at Khao National Park. Grey = 2000, Black = 2001.....47
10	Larval structures of <i>Simulium angulistylum</i> . A, lateral view of mature larva; B, hypostomium; C, apical tip of mandible; D, setae on abdomen; E, F: head capsule; E, dorsal view; F, ventral view; G, gill histoblast.....58
11	Pupal structures of <i>Simulium angulistylum</i> . A, dorsal view; B, terminal hooks; C, D: head integument in front view; C, female; D, male; E, gill filaments.....59
12	Adult structures of <i>Simulium angulistylum</i> female. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, mandible; F, legs (fore, mid and hind legs from left).....60

LIST OF FIGURES (CONTINUED)

Figure	Page
13	Adult structures of <i>Simulium angulistylum</i> male. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, legs (fore, mid and hind legs from left).....61
14	Larval structures of <i>Simulium decuplum</i> . A, lateral view of mature larva; B, hypostomium; C, apical tip of mandible; D, setae on abdomen; E, F: head capsule; E, dorsal view; F, ventral view; G, gill histoblast.....64
15	Pupal structure of <i>Simulium decuplum</i> . A, dorsal view; B, terminal hooks; C, D: head integument in front view, C, female, D, male, E, gill filaments....65
16	Adult structures of <i>Simulium decuplum</i> female. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, mandible; F, legs (fore, mid and hind legs from left).....66
17	Adult structures of <i>Simulium decuplum</i> male. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, legs (fore, mid and hind legs from left).....67
18	Larval structures of <i>Simulium dentistylum</i> . A, lateral view of mature larva; B, hypostomium; C, apical tip of mandible; D, setae on abdomen; E, F: head capsule; E, dorsal view; F, ventral view; G, gill histoblast.....69
19	Pupal structures of <i>Simulium dentistylum</i> . A, dorsal view; B, gill filaments..70
20	Larval structures of <i>Simulium gombakense</i> . A, lateral view of mature larva; B, gill histoblast; C, D: head capsule; C, dorsal view; D, ventral view; E, hypostomium; F, apical tip of mandible.....72
21	Pupal structures of <i>Simulium gombakense</i> . A, dorsal view; B, gill filaments.73
22	Larval structures of <i>Simulium siamense</i> . A, lateral view of mature larva; B, hypostomium; C, apical tip of mandible; D, setae on abdomen; E, F: head capsule; E, dorsal view; F, ventral view; G, gill histoblast.....76
23	Pupal structures of <i>Simulium siamense</i> . A, cocoon in dorsal view; B, terminal hooks; C, D: head integument in front view; C, female; D, male; E, gill filaments.....77

LIST OF FIGURES (CONTINUED)

Figure	Page
24	Adult structures of <i>Simulium siamense</i> female. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, mandible; F, legs (fore, mid and hind legs from left).....78
25	Adult structures of <i>Simulium siamense</i> male. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, legs (fore, mid and hind legs from left).....79
26	Larval structures of <i>Simulium</i> sp. A. A, lateral view of mature larva; B, hypostomium; C, apical tip of mandible; D, setae on abdomen; E, F: head capsule; E, dorsal view; F, ventral view; G, gill histoblast.....82
27	Pupal structures of <i>Simulium</i> sp. A. A, dorsal view; B, terminal hooks; C, D: head integument in front view, C, female, D, male, E, gill filaments....83
28	Adult structures of <i>Simulium</i> sp. A female. A, genitalia in ventral view; B, claw; C, antenna; D, maxillary palp; E, mandible; F, legs (fore, mid and hind legs from left).....84
29	Adult structures of <i>Simulium</i> sp. A male. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, legs (fore, mid and hind legs from left).....85
30	Larval structures of <i>Simulium asakoe</i> . A, lateral view of mature larva; B, C and F, G: head capsule, B, F, dorsal view; C, G, ventral view; D, apical tip of mandible; E, setae on abdomen; H, hypostomium; I, gill histoblast88
31	Pupal structures of <i>Simulium asakoe</i> . A, cocoon in dorsal view; B, terminal hooks; C, D: head integument in front view; C, female; D, male; E, gill filaments89
32	Adult structures of <i>Simulium asakoe</i> female. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, mandible; F, legs (fore, mid and hind legs from left).....90

LIST OF FIGURES (CONTINUED)

Figure	Page
33	Adult structures of <i>Simulium asakoe</i> male. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, legs (fore, mid and hind legs from left).....91
34	Larval structures of <i>Simulium sheilae</i> . A, lateral view of mature larva; B, hypostomium; C, apical tip of mandible; D, setae on abdomen; E, F: head capsule; E, dorsal view; F, ventral view; G, gill histoblast.....93
35	Pupal structures of <i>Simulium sheilae</i> . A, cocoon in dorsal view; B, terminal hooks; C, D: head integument in front view; C, female; D, male; E, gill filaments.....94
36	Adult structures of <i>Simulium sheilae</i> female. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, mandible; F, legs (fore, mid and hind legs from left).....95
37	Adult structures of <i>Simulium sheilae</i> male. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, legs (fore, mid and hind legs from left).....96
38	Larval structures of <i>Simulium</i> sp. nr. <i>sheilae</i> . A, lateral view of mature larva; B, C and F, G: head capsule; B, F, dorsal view; C, G, ventral view; D, apical tip of mandible; E, setae on abdomen; H, hypostomium; I, gill histoblast.....100
39	Pupal structures of <i>Simulium</i> sp. nr. <i>sheilae</i> . A, cocoon in dorsal view; B, terminal hooks; C, D: head integument in front view; C, female; D, male; E, gill filaments.....101
40	Adult structures of <i>Simulium</i> sp. nr. <i>sheilae</i> female. A, genitalia in ventral view; B, claw; C, antenna; D, maxillary palp; E, mandible; F, legs (fore, mid and hind legs from left).....102
41	Adult structures of <i>Simulium</i> sp. nr. <i>sheilae</i> male. A, genitalia in ventral view; B, claw; C, antenna; D, maxillary palp; E, legs (fore, mid and hind legs from left).....103

LIST OF FIGURES (CONTINUED)

Figure	Page
42	Larval structures of <i>Simulium novemarticulatum</i> . A, lateral view of mature larva; B, hypostomium; C, apical tip of mandible; D, setae on abdomen; E, F: head capsule; E, dorsal view; F, ventral view; G, gill histoblast.....107
43	Pupal structures of <i>Simulium novemarticulatum</i> . A, cocoon in dorsal view; B, terminal hooks; C, D: head integument in front view; C, female; D, male; E, gill filaments.....108
44	Adult structures of <i>Simulium novemarticulatum</i> female. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, mandible; F, legs (fore, mid and hind legs from left).....109
45	Adult structures of <i>Simulium novemarticulatum</i> male. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, legs (fore, mid and hind legs from left).....110
46	Larval structures of <i>Simulium</i> sp B. A, lateral view of mature larva; B, hypostomium; C, apical tip of mandible; D, setae on abdomen; E, F: head capsule; E, dorsal view; F, ventral view; G, gill histoblast.....113
47	Larval structures of <i>Simulium</i> sp. C. A, lateral view of mature larva; B, gill histoblast; C, D: head capsule; C, dorsal view; D, ventral view; E, hypostomium; F, apical tip of mandible.....116
48	Larval structures of <i>Simulium feuerborni</i> . A, dorsal view of mature larva; B, gill histoblast; C, D: head capsule; C, dorsal view; D, ventral view; E, hypostomium; F, apical tip of mandible.....118
49	Pupal structures of <i>Simulium feueborni</i> . A, dorsal view; B, gill filaments; C, terminal hooks; D, E: head integument in front view: D, female; E, male.....119
50	Adult structures of <i>Simulium feuerborni</i> female. A, genitalia in ventral view; B, claw; C, antenna; D, maxillary palp; E, mandible; F, legs (fore, mid and hind legs from left).....120

LIST OF FIGURES (CONTINUED)

Figure	Page
51	Adult structures of <i>Simulium feuerborni</i> male. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, legs (fore, mid and hind legs from left).....121
52	Pupal structures of <i>Simulium grossifilum</i> . A, B: cocoon and pupal exuviae; A, dorsal view; B, lateral view; C, head integument of male in front view; D, gill filaments; E, terminal hooks.....123
53	Adult structures of <i>Simulium grossifilum</i> male. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, legs (fore, mid and hind legs from left).....124
54	Larval structures of <i>Simulium rudnicki</i> . A, lateral view of mature larva; B, gill histoblast; C, D: head capsule; C, dorsal view; D, ventral view; E, hypostomium; F, apical tip of mandible.....126
55	Pupal structures of <i>Simulium rudnicki</i> . A, dorsal view; B, gill filaments.....127
56	Larval structures of <i>Simulium chainarongi</i> . A, lateral view of mature larva; B, gill histoblast; C, D: head capsule; C, dorsal view; D, ventral view; E, hypostomium; F, apical tip of mandible.....130
57	Larval structures of <i>Simulium fenestratum</i> . A, lateral view of mature larva; B, gill histoblast; C, D: head capsule; C, dorsal view; D, ventral view; E, hypostomium; F, apical tip of mandible.....133
58	Pupal structures of <i>Simulium fenestratum</i> . A, dorsal view; B, cocoon in lateral view; C, D: head integument in front view; C, female; D, male; E, gill filaments; F, terminal hooks.....134
59	Adult structures of <i>Simulium fenestratum</i> female. A, genitalia in ventral view; B, claw; C, antenna; D, maxillary palp; E, mandible; F, legs (fore, mid and hind legs from left).....135
60	Adult structures of <i>Simulium fenestratum</i> male. A, genitalia in ventral view; B, claw; C, antenna; D, maxillary palp; E, legs (fore, mid and hind legs from left).....136

LIST OF FIGURES (CONTINUED)

Figure	Page
61	Larval structures of <i>Simulium nakhonense</i> . A, lateral view of mature larva; B, gill histoblast; C, D: head capsule; C, dorsal view; D, ventral view; E, hypostomium; F, apical tip of mandible.....139
62	Pupal structures of <i>Simulium nakhonense</i> . A, dorsal view; B, cocoon in lateral view; C, terminal hooks; D, E: head integument in front view: D, female; E, male; F, gill filaments.....140
63	Adult structures of <i>Simulium nakhonense</i> female. A, genitalia in ventral view; B, claw; C, antenna; D, maxillary palp; E, mandible; F, legs (fore, mid and hind legs from left).....141
64	Adult structures of <i>Simulium nakhonense</i> male. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, legs (fore, mid and hind legs from left).....142
65	Larval structures of <i>Simulium quinquestriatum</i> . A, lateral view of mature larva; B, gill histoblast; C, D: head capsule; C, dorsal view; D, ventral view; E, hypostomium; F, apical tip of mandible.....145
66	Pupal structures of <i>Simulium quinquestriatum</i> . A, dorsal view; B, cocoon in lateral view; C, terminal hooks; D,E: head integument in front view; D, female; E, male; F, gill filaments146
67	Adult structures of <i>Simulium quinquestriatum</i> female. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, mandible; F, legs (fore, mid and hind legs from left).....147
68	Adult structures of <i>Simulium quinquestriatum</i> male. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, legs (fore, mid and hind legs from left).....148
69	Larval structures of <i>Simulium tani</i> . A, lateral view of mature larva; B, gill histoblast; C, D: head capsule; C, dorsal view; D, ventral view; E, hypostomium; F, apical tip of mandible.....151

LIST OF FIGURES (CONTINUED)

Figure	Page
70	Pupal structures of <i>Simulium tani</i> . A, dorsal view; B, cocoon in lateral view; C, terminal hooks; D,E: head integument in front view; D, female; E, male; F, gill filaments.....152
71	Adult structures of <i>Simulium tani</i> female. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, mandible; F, legs (fore, mid and hind legs from left).....153
72	Adult structures of <i>Simulium tani</i> male. A, genitalia in ventral view; B, claws; C, antenna; D, maxillary palp; E, legs (fore, mid and hind legs from left).....154
73	Larval structures of <i>Simulium</i> sp. D. A, lateral view of mature larva; B, gill histoblast; C, D: head capsule; C, dorsal view; D, ventral view; E, hypostomium; F, apical tip of mandible.....157
74	Pupal structures of <i>Simulium</i> sp. D. A, dorsal view; B, lateral view; C, gill filaments.....158
75	Larval structures of <i>Simulium</i> sp. E. A, dorsal view of mature larva; B, gill histoblast; C, D: head capsule; C, dorsal view; D, ventral view; E, hypostomium; F, apical tip of mandible.....161
76	Pupal structures of <i>Simulium</i> sp. E. A, dorsal view; B, gill filaments.....162
77	The karyotype of larval polytene chromosomes of <i>Simulium angulistylum</i> . CI, CII, and CIII, centromeres of chromosomes I, II, and III; S and L, short and long arms, respectively; Bl, blister; Bu, bulge; NO, nucleolar organizer; RB, ring of Balbiani.....164
78	The karyotype of larval polytene chromosomes of <i>Simulium decuplum</i> . CI, CII, and CIII, centromeres of chromosomes I, II, and III; S and L, short and long arms, respectively; Bl, blister; Bu, bulge; NO, nucleolar organizer; RB, ring of Balbiani.....167

LIST OF FIGURES (CONTINUED)

Figure	Page
79	The karyotype of larval polytene chromosomes of <i>Simulium dentistylum</i> . I, II, and III, chromosomes; S and L, short and long arms, respectively; C, centromere; Bl, blister; Bu, bulge; NO, nucleolar organizer; RB, ring of Balbiani.....168
80	The karyotype of larval polytene chromosomes of <i>Simulium gombakense</i> . CI, CII, and CIII, centromeres of chromosomes I, II, and III; S and L, short and long arms, respectively; Bl, blister; Bu, bulge; NO, nucleolar organizer; RB, ring of Balbiani.....169
81	The karyotype of larval polytene chromosomes of <i>Simulium siamense</i> . CI, CII, and CIII, centromeres of chromosomes I, II, and III; S and L, short and long arms, respectively; Bl, blister; Bu, bulge; NO, nucleolar organizer; RB, ring of Balbiani.....170
82	The karyotype of larval polytene chromosomes of <i>Simulium asakoeae</i> . CI, CII, and CIII, centromeres of chromosomes I, II, and III; S and L, short and long arms, respectively; Bl, blister; Bu, bulge; NO, nucleolar organizer; RB, ring of Balbiani.....173
83	The karyotype of larval polytene chromosomes of <i>Simulium sheilae</i> . II, chromosome; S and L, short and long arms, respectively; C, centromere; Bu, bulge; NO, nucleolar organizer; RB, ring of Balbiani....174
84	The karyotype of larval polytene chromosomes of <i>Simulium</i> sp. nr. <i>sheilae</i> . CI, CII, and CIII, centromeres of chromosomes I, II, and III; S and L, short and long arms, respectively; Bl, blister; Bu, bulge; NO, nucleolar organizer; RB, ring of Balbiani.....175
85	The karyotype of larval polytene chromosomes of <i>Simulium novemarticulatum</i> . I, II, and III, chromosomes; S and L, short and long arms, respectively; C, centromere; Bu, bulge; NO, nucleolar organizer; RB, ring of Balbiani.....176

LIST OF FIGURES (CONTINUED)

Figure	Page
86	The karyotype of larval polytene chromosomes of <i>Simulium</i> sp. B. CI, CII, and CIII, centromeres of chromosomes I, II, and III; S and L, short and long arms, respectively; Bl, blister; Bu, bulge; NO, nucleolar organizer; RB, ring of Balbiani.....177
87	The karyotype of larval polytene chromosomes of <i>Simulium</i> sp. C. I, II, and III, chromosomes; S and L, short and long arms, respectively; C, centromere; Bl, blister; Bu, bulge; NO, nucleolar organizer; RB, ring of Balbiani.....178
88	Idiograms of chromosome arm IIS for 12 <i>Simulium</i> species in the subgenus <i>Gomphostilbia</i> from Khao Yai National Park, showing relative locations of Ce, centromere; RB, ring of Balbiani; Bu, bulge; Sh, shoestring. A, <i>Simulium angulistylum</i> ; B, <i>S. decuplum</i> ; C, <i>S. dentistylum</i> ; D, <i>S. gombakense</i> ; E, <i>S. siamense</i> ; F, <i>S. sp. A</i> ; G, <i>S. asakoeae</i> ; H, <i>S. sheilae</i> ; I, <i>S. sp. nr. sheilae</i> ; J, <i>S. novemarticulatum</i> ; K, <i>S. sp. B</i> ; L, <i>S. sp. C</i>181
89	Species accumulation from 20 collection sites between July 2000 and June 2001 (solid line) with estimated 95% confidence limits (dashed blue) and singleton (red solid) and doubleton (green solid) curves.....183
90	Drought and black fly abundance.....186
91	Altitude and black fly abundance. Black=no drought, blue=less than six months drought, green=six or more months.....186
92	Water temperature and black fly abundance. Black=no drought, blue=less than six months drought, green=six or more months drought.....187
93	pH and black fly abundance. Black=no drought, blue=less than six months drought, green=six or more months drought.....187
94	Stream size (max. width) and black fly abundance. Black=no drought, blue=less than six months drought, green=six or more months drought.....188
95	Canopy and black fly abundance.....188

LIST OF FIGURES (CONTINUED)

Figure	Page
96 Substrate type and black fly mean abundance. B = bedrock, R = rock, G = gravel, and S = sand.....	189
97 Human disturbance and black fly mean abundance.....	189
98 Drought and black fly estimated species.....	194
99 Altitude and black fly estimated species. Black = no drought, blue = less than six months drought, green = six or more months drought.....	194
100 Water temperature and black fly estimated species. Black = no drought, blue = less than six months drought, green = six or more months drought.....	195
101 pH and black fly estimated species. Black = no drought, blue = less than six months drought, green = six or more months drought.....	195
102 Stream size (max. width) and black fly estimated species. Black = no drought, blue = less than six months drought, green = six or more months drought.....	196
103 Canopy and black fly estimated species.....	196
104 Substrate type and black fly estimated species. B = bedrock, R = rock, G = gravel, and S = sand	197
105 Human disturbance and black fly estimated species.....	197
106 Drought and black fly observed species.....	198
107 Altitude and black fly observed species. Black = no drought, blue = less than six months drought, green = six or more months drought.....	198
108 Water temperature and black fly observed species. Black = no drought, blue = less than six months drought, green = six or more months drought.....	199
109 pH and black fly observed species. Black = no drought, blue = less than six months drought, green = six or more months drought.....	199

LIST OF FIGURES (CONTINUED)

Figure	Page
110 Stream size (max. width) and black fly observed species. Black = no drought, blue = less than six months drought, green = six or more months drought.....	200
111 Canopy and black fly observed species.....	200
112 Substrate type and black fly observed species. B = bedrock, R = rock, G = gravel, and S = sand	201
113 Human disturbance and black fly observed species.....	201
114 Drought and black fly Fisher's α	203
115 Altitude and black fly Fisher's α . Black = no drought, blue = less than six months drought, green = six or more months drought.....	203
116 Water temperature and black fly Fisher's α . Black = no drought, Blue = less than six months drought, green = six or more months drought.....	204
117 pH and black fly Fisher's α . Black = no drought, blue = less than six months drought, green = six or more months drought.....	204
118 Stream size (max. width) and black fly Fisher's α . Black = no drought, blue = less than six months drought, green = six or more months drought.....	205
119 Canopy and black fly Fisher's α	205
120 Substrate type and black fly Fisher's α . B = bedrock, R = rock, G = gravel, and S = sand	206
121 Human disturbance and black fly Fisher's α	206
122 Transformed Black fly CCA (without constraint) ordination diagram and the 20 collection sites. Black = disturbed, Red = undisturbed.....	208
123 Black fly CCA ordination diagram and the 20 collection sites. Black = species, Red = collection sites.....	209
124 Larval Tipulidae (Diptera) showing lateral view. A, <i>Antocha</i> sp.; B, <i>Hexatoma</i> sp.; C, <i>Tipula</i> sp.....	213

LIST OF FIGURES (CONTINUED)

Figure	Page
125 Larval Blephariceridae (Diptera) showing dorsal and ventral view. A, <i>Blepharicera</i> sp.; B, <i>Apistomyia</i> sp.....	214
126 Larval Psychodidae (Diptera) showing dorsal, ventral and lateral view. A, B <i>Neotelmatoscopus</i> sp.; C, <i>Telmatoscopus</i> sp.....	215
