ABSTRACT

The purposes of this research were :1) to study the opinions of private school administrators towards the government policy on education in the kindergarten level, 2) to investigate the private kindergarten school management in accordance with the government policy ; 3) to find out some suggestions and recommendations for rectifying and developing the kindergarten school.

The sample subjects consisted of 55 private school administrators. A set of questionnaires was employed to collect data. The earned data were analyzed to acquire percentage, arithmetic mean , and standard deviation.

Research Findings :

1. It was found that the private administrators perceived the government policy towards education in the kindergarten level at “average” level on the aspects of policy , objective , and educational target, Furthermore ,

most of the sample subjects recommended that the provincial plan should be carried out with collaboration of locality.

2. It was perceived by the sample subjects that the private kindergarten school management was carried out in accordance with the government policy at "moderate" level

3. Some suggestions received from the sample subjects were to follow the National Education Scheme 8 th. by expanding educational opportunity , especially in the remote areas and for disadvantageous youth.
