ABSTACT

The purpose of the study was to study the existing operation, the problems and suggestions of the educational loan fund committee in the educational institutes in Changwat Khon Kaen.

The sampling group of study was the loan Grant Consideration Committee in educational institutes in Changwat Khon Kaen. All data were given by institutional executive assistants and guidance teachers or other teachers who were authorized by the executive of each institute. The Loan Grant Consideration Committee was made up of 301 persons. Major tools used for the study were questionnaires and interview form. The data were analyzed by SPSS/PC' program to find frequencies, percentage, arithmetic means, standard deviations.

FINDINGS

1. The operation of the loan Grant Consideration Committee was operated at “above average” level. The first three functions of “above average” levels were the report of student selection processes, the publicity of educational loan fund, and the arrangement of the meetings on the selection of eligible students. The report about students withdrawal was the last but not least operation.

2. The operating problems of educational loan fund were found at “above average” levels. The first three functions of levels were the insufficient amount of loan fund, the lack of confidence to return the loan fund within a limited time, and the lack of expenses for operation. The last but not least problem was found at a “moderate” level was the lack of understanding the rules.

3. Concerning the suggestions and opinions in operating educational loan fund, there were three main points that should be improved: (1) the educational loan fund should be handled by the Krung Thai Bank Public Company Limited only, (2) the criteria of parents income should be no more than 150,000 bath (3) the educational loan fund contract should be made once a year.
